OBJECTIVE

Computer Science and Engineering (Data Science) undergraduate with strong foundations in software development, data structures, algorithms, and full-stack application development. Passionate about building scalable, AI-enabled solutions and seeking a Software Engineer role to contribute to innovative products while continuously learning and growing.

EDUCATION

CVR College of Engineering, Hyderabad	2023 – 2027
<i>B.Tech in Computer Science and Engineering (Data Science)</i>	<i>CGPA: 8.35/10</i>
Narayana Junior College, Suchitra	2021 – 2023
<i>Intermediate (MPC Stream)</i>	<i>Marks: 959/1000 (95.9%)</i>

PROJECTS

Startup Idea Validation Platform | *FastAPI, React, Google Gemini API, Docker*

- Developed a full-stack platform that analyzes startup ideas using Google Gemini API to generate viability reports, competitor analysis, and business insights.
- Built RESTful APIs with FastAPI and integrated a React frontend for real-time idea evaluation and report generation.
- Containerized the application using Docker Compose to enable consistent development and deployment.

AtmosTrack – Air Quality ETL & Analytics System | *Python, REST APIs, PostgreSQL*

- Designed an ETL pipeline to collect, validate, and store real-time air quality data from public APIs.
- Implemented retry mechanisms, batch inserts, and data validation to improve reliability and consistency.
- Developed modular Python components for data ingestion, transformation, and analytics using PostgreSQL.

Movie Review Sentiment Analysis System | *Python, TensorFlow, Keras, Streamlit*

- Developed an NLP-based sentiment analysis system by comparing SimpleRNN, LSTM, and GRU architectures.
- Implemented text preprocessing including tokenization, sequence generation, and padding for model training.
- Achieved **82.18%** accuracy using GRU and deployed an interactive Streamlit application for real-time sentiment prediction.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, R, MATLAB (Basic)
Web & Backend Technologies: Flask, FastAPI, Node.js, React, HTML, CSS, JavaScript
Databases: SQL, PL/SQL, PostgreSQL
Tools & Platforms: Git, GitHub, Docker, VS Code, Google Colab
Core Concepts: Data Structures, Algorithms, OOP, DBMS, OS

CERTIFICATIONS

AWS Academy – Cloud Foundations
Alteryx – Data Analytics Process Automation Virtual Internship
AICTE – Altair Data Science Master Virtual Internship
Oracle Academy – Database Programming with SQL
Oracle Academy – Database Design

ACHIEVEMENTS

Solved 150+ coding problems on LeetCode focusing on data structures and algorithms.
CodeChef rating above 1400; active Div-3 competitive programmer.
Scored 409 in GATE Data Science & AI (DA) 2026, AIR 5899.
